The 2013 Import and Export Market for Residues Resulting from the Manufacture of Starch, Beet-Pulp, or Bagasse and Wastes Resulting from the Manufacture of Sugar or Brewing and Distilling in Japan

by Icon Group International

Sugar Beet - EastAgri Brazil is the world’s second largest producer of ethanol fuel. Brazil and the United States led the industrial production of ethanol fuel in 2010, and as a result of supply concerns and high ethanol fuel prices, the Brazilian government unveiled an ethanol production target . However, Brazil has a high reliance on domestic production and has struggled to meet its targets. In Europe, sugar beet is used to produce fuel ethanol, and is a major contributor to the biofuel market. In addition, it is a major source of renewable diesel from crude tall oil, a residual product of the pulp and paper industry.
